

CMX005 70 kV 300 uA X-Ray Source

■ General Description:

This continuous duty cycle 70 kv source is used for bone density applications and many industrial inspection products.

Characteristics:

Target Voltage	20 –70 kV
Maximum Power	21 W
Maximum Target Current	300 uA
Focal Spot Size	.25 mm
Beam Angle	24 degree
Operation	Continuous
Target Material	Tungsten
Window Material	Titanium
Window Thickness	.005"
Input Voltage	100, 120, 200 or 220 VAC
Interlock	Close Contact
Weight	16.0 lbs
Cooling	Air

Dimensional Outline (unit: in)
