

## CMX508/SS 80 kV 0.5 mA X-Ray Source

### ■ General Description:

This source is a low cost 40 watt alternative to other sources of a much higher cost. This is a direct replacement for Gamma Medica & TriFoil x-ray systems (cable not included).

### Characteristics:

Target Voltage	30 - 80 kV
Maximum Power	40 W
Maximum Target Current	0.5 mA
Focal Spot Size	0.25 mm
Beam Angle	36 degrees
Operation	Continuous
Target Material	Tungsten
Window Material	Glass
Window Thickness	.050"
Input Voltage	100, 120, 200 or 220 VAC
Interlock	Close Contact
Weight	9.0 lbs
Cooling	Forced Air

# 80 kV Controller
