

CMX510 50 kV 1.0 mA X-Ray Source

■ General Description:

This source is a low cost 50 watt alternative to conventional plating thickness sources of much higher cost.

Characteristics:

Target Voltage	20 – 50 kV
Maximum Power	50 W
Maximum Target Current	1.0 mA
Focal Spot Size	.25 mm
Beam Angle	35 degree
Operation	Continuous
Target Material	Tungsten
Window Material	Titanium
Window Thickness	.005"
Input Voltage	100, 120, 200 or 220 VAC
Interlock	Close Contact
Weight	9.0 lbs
Cooling	Air

50 kV X-Ray Source

Dimensional Outline (unit: in)
